The Future of Government Procurement

09:00 **FIRESIDE CHAT: What the future holds for government procurement**
Procurement is being asked to step into a broader role than ever before, from delivering savings and innovation to driving social, environmental, and resilience outcomes. In this candid discussion, senior leaders will share their perspectives on the biggest shifts shaping the future of procurement and how to adapt to meet a new expanded mandate.

Strengthening Governance, Ethics and Integrity

09:40 **Lessons from Operation Hector**
Operation Hector was an ICAC procurement investigation involving two public authorities, many different companies and two very different procurement approaches. As a result, it provides a broad sweep of procurement corruption risks and risk factors.

This presentation will provide an overview of the:

- corrupt scheme in Operation Hector and how it evolved over time
- systemic issues that were conducive to corrupt conduct at each authority
- root causes of systemic issues in each authority.

Dr Benjamin Marx
Principal Officer - Corruption Prevention
Independent Commission Against Corruption (ICAC)

Harnessing AI & Automation to Transform Procurement

10:10 **CASE STUDY: Using AI and automation to increase procurement efficiency and reduce bottlenecks**
This session deep dives into the AI-enabled procurement automation program at Blacktown City Council, which received a grant as part of NSW's Early Adopter Grant Program to utilise AI in its systems. The presentation demonstrates how AI and automation tools can be applied to RFx drafting, supplier scoring, and contract management to cut cycle times, reduce admin burden, and free staff for higher-value work.

Mohsen Mousavi
Faculty of Science & Engineering
Macquarie University

10:40 Morning Tea & Networking

11:00 **PANEL DISCUSSION: How can procurement leaders harness new technologies to solve procurement challenges & deliver real value?**

- Which emerging technologies are proving most useful in addressing day-to-day procurement challenges, and why?
- How can tools like AI or automation reduce bottlenecks without adding new risks or complexity?
- What obstacles make it difficult for procurement teams to adopt new tech, and how can they be overcome?
- Where should procurement leaders focus first to get the most value out of digital tools?

PRE-CONFERENCE MASTERCLASSES

Tuesday, 10 March

**SEPARATELY
BOOKABLE**

Available to book separately or as a part of your 3-day conference pass

The pre-conference masterclasses provide attendees with morning and afternoon tea breaks and a 1-hour lunch break allowing for extra networking opportunities and in-depth learning.

The masterclasses start at 9:00 and finish at 16:30.

Masterclass A:

Mastering Negotiation Skills – the Cornerstone of Procurement Success

Whether you're securing a high-stakes deal, advocating for a promotion, or navigating the complexities of cross-functional collaboration, negotiation is a fundamental business skill that can shape your career trajectory.

Through practical strategies, real-world scenarios, and expert facilitation, this highly interactive session will equip you with the tools to advocate for yourself and your ideas, unlock new opportunities, and drive better outcomes for your organisation and career.

Learning Outcomes:

- Examining the core principles of effective negotiation and how to apply them in both formal and informal settings
- Exploring proven techniques for managing nerves, overcoming imposter syndrome, and approaching negotiations with calm self-assurance
- Developing strategies to handle pushback, conflict, and high-pressure discussions with professionalism and poise
- Learning how to assess what you bring to the table, identify leverage points, and position your value to others persuasively
- Discovering how to achieve your goals while maintaining respect, trust, and collaboration with peers and stakeholders
- Identifying your personal negotiation style, adapting it to different scenarios, and building a flexible toolkit that works across contexts

By the end of this masterclass, you'll walk away with a renewed sense of confidence, a clear set of actionable strategies, and a framework for approaching every negotiation, big or small, with purpose and skill.

Facilitator:

Bronwyn Williams

Keynote Speaker, Mentor & PhD Researcher

Masterclass B:

AI Toolbox for Procurement Professionals

Procurement professionals are increasingly being asked to understand and apply artificial intelligence, yet many feel unsure where to start. With so much hype around AI, the challenge is to separate what is useful from what is unrealistic, and to build confidence in using AI-enabled tools for everyday procurement tasks.

This one-day masterclass provides a practical, hands-on introduction to AI concepts, demonstrates their applications in the procurement lifecycle, and equips attendees with the skills to experiment safely and confidently.

Learning Outcomes

- Examining the main categories of AI tools relevant to government procurement
- Analysing how AI can support tasks such as drafting RFx documents, identifying supplier risks, automating scoring, and streamlining reporting
- Working through demonstrations of accessible AI applications, giving attendees a chance to experiment with tools in a guided environment
- Understanding common pitfalls, including data quality issues, bias, and over-reliance on automation, while learning to use AI responsibly
- Building a set of techniques and recommended tools that can be immediately applied to everyday procurement activities

By the end of this masterclass, attendees will have the knowledge and confidence to engage with AI, identify where it can make their work easier, and use it in ways that add value while staying compliant with government standards.

Whether you are drafting documents, evaluating suppliers, or reporting on contract performance, this session will reveal how AI can become a trusted part of your procurement toolbox.
